Reasons for Allowance

1. Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the references, either singularly or in combination, disclose the totality of combined elements: a method for processing a return product, for use with a system for processing a return product, which allows a manufacturer to inquire return product data through a browser of a terminal device and a network communication system, pre-constructed with a material database for storing a BOM (bill of material) file of each product category, wherein the BOM file includes a product category code and assembly data, and the product category code is used as an identification number of the BOM file; the method comprising the steps of:

(7) determining via the return product processing station if the repaired but not properly operating return product is to be disassembled for obtaining useful assemblies therein, wherein if the return product is to be disassembled, then step (8) is followed; or else, step (9) is followed;

(8) constructing a material stock file via the system for processing a return product according to the disassembled useful assemblies of the return product, and re-assembling the useful assemblies to semi-fabricated products in production via the production line after reading the material stock file; and

(9) constructing a testing product lacking assembly file via the system for processing a return product according to unuseful assemblies of the repaired but not properly operating return product, and replacing the unuseful assemblies of the return product with useful assemblies for making the return product be an exporting product via the production line after reading the testing product lacking assembly file.

The closest prior art, Hauser et al (US 6,536,659 B1), discloses a method for handling goods returned by customers of a plurality of different merchants who have authorized return of merchandise and transmit data identifying the customer and the merchandise to be returned to a central return facility for inclusion in a database, but fails to disclose the above claimed features.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

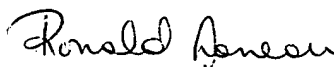

- Kall et al (US 2003/0200130 A1) disclose a suite of configurable supply chain infrastructure modules for deploying collaborative e-manufacturing solutions.
- Lee et al (US 2004/0117383 A1) disclose a method, system and program for customer service and support management.
